

ROBINS INFANT II

MARCH NEWSLETTER 2024

Dear Parents,

Welcome Spring! This month ushers in a new season. We look forward to watching the change in God's world as nature begins to grow. It is our goal to help each infant, grow and appreciate the love and beauty of the world around them that God has created. We will show the babies how we should always be good stewards of what God has given us.

As we enter the month of March, our focus turns to Jesus Christ on the cross. His death and His resurrection. By His death for our sins, we are forgiven and have eternal life in Heaven.

Everyone needs time to make transitions. Transitions are about change. It takes the brain a few minutes to tune in to new experiences, people, or environments. Adults are used to making transitions. Babies are not. Transitions for infants are also about change (a passage from one experience, caregiver, stage or activity to another) but occur more often and are less expected than those adults make. It is important for adults to recognize that infants react to even the smallest changes in their lives. For babies, some transitions occur with physical development. They move quickly from being totally helpless to being able to sit, crawl and walk. Some transitions occur because of caregiver changes. Each adult a baby interacts with has a different smell, look, touch, and voice. Some transitions occur because of a change in the environment, such as lighting and temperature. Other transitions are related to routines, such as feeding, diaper changing, and napping.

We are looking forward to a wonderful and blessed month again. We would like to thank you for entrusting your child with us, to love and care for daily.

God's Blessings

Ms. Leslie Gordon and Ms. MaryAnn Freire
