

For over a year now the solar energy system in the medical clinic has been performing poorly due to exhausted marine batteries that were first installed in the fall of 2019. By the Fall of 2023, there was no storage and just enough power to light a microscope for two hours at midday. Thanks to the work of the Holy Spirit, the Mission Endowment Fund, here at Grace, granted us over \$1700 towards the \$2300 needed to replace all eight batteries and cables. This was accomplished on the 14th of April and now there is full power 24 hours a day!

"And God said, Let there be light: and there was light. And God saw the light, that it was good: and God divided the light from the darkness. And God called the light Day, and the darkness he called Night. And the evening and the morning were the first day." Genesis 1:3-5
