

## The Oldest Dinosaur

Many people mistakenly believe that dinosaurs prove evolution. After all, dinosaurs are strange creatures and seem to represent a very different world from the one we know today. But a recent discovery of the most ancient dinosaur challenges this.

One of the oldest dinosaurs ever discovered was about six feet long and weighed about 300 pounds. Scientists had never before seen a complete skeleton of the creature they called *Herrerasaurus*. But being the most ancient dinosaur discovered at the time, perhaps the dinosaur from which all others evolved, evolutionary scientists expected it to be much less advanced than later dinosaurs. What they found was yet another well-designed creature.

The meat-eating dinosaur had excellent teeth, like those of a shark; its jawbone had a double hinge so that it could easily hang onto its prey. These sophisticated features weren't expected in such an ancient dinosaur. This is yet another proof that all creatures were well-designed from the beginning. *Herrerasaurus* is yet one more example of the impossibility of evolution.

Dinosaurs, just like all other creatures, were created by God during the first six days the universe existed. This means that dinosaurs and humans once shared this earth in the recent past. All things were created in a perfect state, so there was no need for evolved improvements. The changes we see since creation are not due to evolution but due to the degenerating effects of sin.

### **Romans 1:25**

**"...who exchanged the truth of God for the lie and worshiped and served the creature rather than the Creator, who is blessed forever. Amen."**

Prayer: Dear Lord, teach me to seek my improvement not through created things but through You, the Author of all that is good and the conqueror of all that is evil through Your death on the cross of Calvary and Your Resurrection. Amen.

REF.: Oldest dinosaur, *Time*.
